Working to improve the lives of individuals with autism and the people who care for them.
Pathfinders is now training Emergency Room and Hospital Staff with help from a curriculum development team consisting of an ER doctor, a nurse, and child life specialists. We have trained at LifeBridge Health at the Sinai Campus and the University of Maryland Medical System, with plans to expand to other regions in the state.

PFA and the Maryland Center for Developmental Disabilities (MCDD) held transition-related regional forums throughout Maryland to ask participants what works, what doesn’t, and for any recommendations they may have.

PFA will use this data to guide long term program planning and to better serve families through workshops and Parent Tips. The MCDD plans to use the data to assist state & local planners in directing resources to areas in need.
